

Kawartha Lake Stewards Association

ANNUAL SPRING MEETING

Mark your Calendars for

Sat. May 8th 2010, 10:00 a.m. to 12:00 p.m.

**BOBCAYGEON PUBLIC SCHOOL
30 Balaclava St**

This year KLSA is announcing an exciting new initiative with Trent University (Dr. Paul Frost) made possible through an Ontario Trillium Foundation grant. The study will identify the primary algal species in the Kawartha Lakes, the factors that constrain algal growth and methods of preventing excessive algal growth.

Our feature speaker will be Ms. Ana M. Morales discussing “Algae in the Kawartha Lakes”.

Other speakers include:

Kathleen Mackenzie -- Maps & Nutrient Trends

Kevin Walters -- Storm Water Pollution

Kyle Borrowman -- Eurasian milfoil

Dr. Eric Sager -- Rethinking the Phosphorus-Aquatic Plants Connection
and special guest:

Mayor Ric McGee, City of Kawartha Lakes -- A Water Quality Vision for the
Kawarthas

This is a meeting for all existing KLSA members or just interested shoreline owners. Instructions and demonstrations of water sampling protocols for E.coli and phosphorus testing will be available.

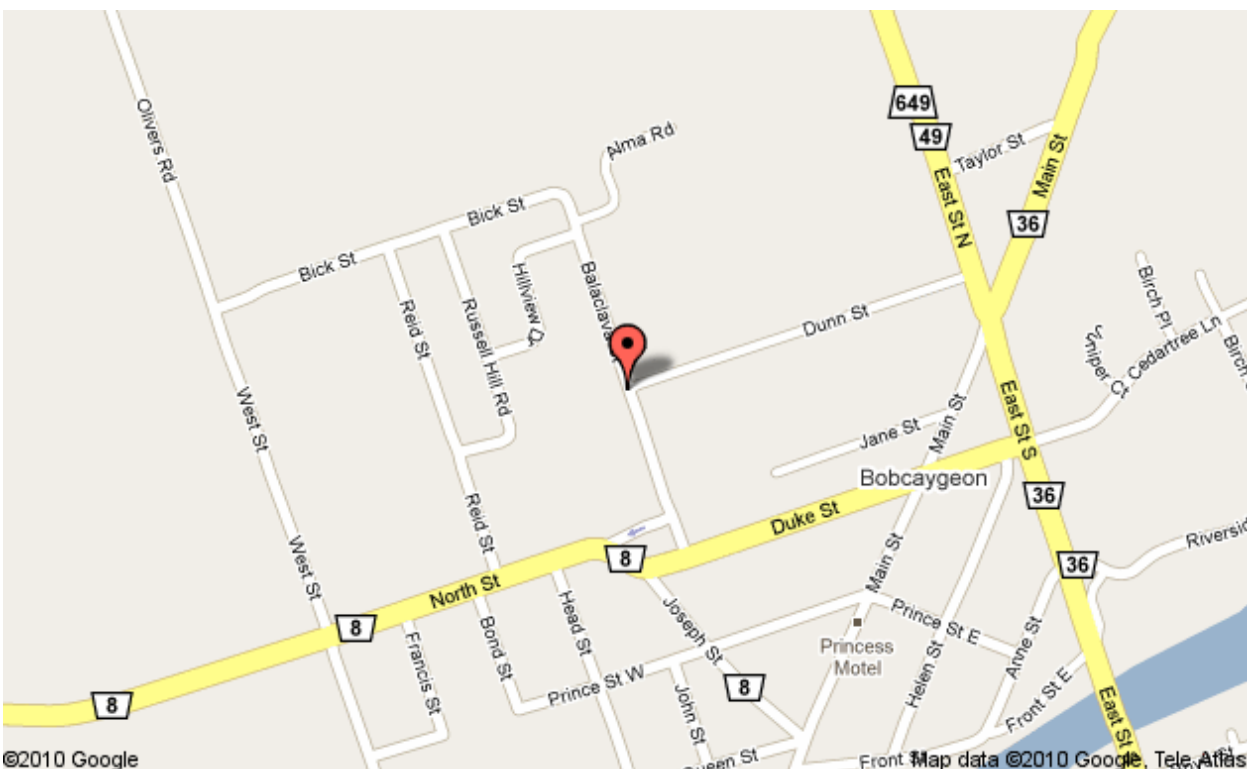

Copies of the 2009 KLSA Lake Water Quality Annual Report containing background articles concerning these and other topics will be available to attendees.

❖ Check out KLSA's website at <http://klsa.wordpress.com>

See you on May 8th – Bring your questions, bring your neighbours

Please see over page for map
