

“ VOICES FOR THE TRENT-SEVERN WATERWAY”

MEETING NOTICE

A public meeting open to all

Buckhorn Community Centre

Saturday, May 30th at 10 a.m.

All of us, lake residents/cottagers, tourist businesses and those who are dependent and enjoy the many available assets of the TSW are concerned about the future of this critical waterway. The TSW has some serious issues that need to be addressed – as proposed in the Panel Report “ It’s All About the Water’ issued in March of 2008.

Last November, in the interests of our Kawartha Lakes, a small group of concerned cottagers, lake presidents, business people and county councillors met to try to formulate a position, to set priorities and express concerns about the recommendations in the Report. A Position Paper was unanimously adopted and all were encouraged to let politicians know we want more action taken to address, among many concerns: infrastructure repair, water quality and conservation, water management levels in the lakes and throughout the system, economic and environmental impacts. We want to approach these issues in a positive and supportive manner. Meeting will be chaired by Brian Hunt longtime Kawartha Lake cottager.
